

Insta360 Wave

Professional Speakerphone

with ✨AI Recording Suite

Insta360 Wave is your professional speakerphone with built-in AI. An 8-mic array captures voices clearly from up to 16 feet away, with advanced noise reduction, echo cancellation, and de-reverberation, and local recording with onboard storage.

Wave includes AI-powered features like transcription, summaries, and chat. Connect via USB-C, Bluetooth, or dongle, no drivers required.

Superior Audio Quality

Insta360 Wave is equipped with 3D 8-mic array, capturing voices at a 48kHz sampling rate from up to 16ft away. It's also powered by AI audio alogrithm, identifying and eliminating over 300 types of environmental noises.

Adaptive Beamforming

Choose from 5 precision-engineered pickup patterns to get optimal audio based on your surroundings.

Meeting Recording

With built-in 32GB storage, Insta360 Wave works as a standalone recorder. Start recording with a single tap!

AI Transcription

An advanced AI chip and intelligent cloud processing work in tandem to transcribe your speech with incredible speed and accuracy. Ensure your message is delivered and conveyed with exceptional quality.

AI Meeting Assistant

Insta360 InSight helps you stay focused by transcribing your recordings, summarizing notes, tagging action items, and answering follow-up questions for you.

Seamless Connectivity with Insta360 Link 2

Group Insta360 Wave with our AI-powered Insta360 Link 2 for a all-in-one solution. A smarter choice for users who chase high-quality video and sound.
