

Confidea F-DI

Confidea Flushmount Delegate Interpretation Unit

Description

The Confidea F-DI is Televic's delegate panel for discussion systems, with an integrated speaker and simultaneous interpretation. Its small form factor, housed in an elegant casing, permits a minimalistic integration into any meeting room furniture. The integrated speaker creates a distributed sound field in the meeting room, increasing intelligibility without the need for an additional room sound system. The panel has a screw-lock connector to fit a removable microphone (available in 30, 40 or 50 cm versions). A 3.5 mm jack socket is available to connect headphones or a hearing loop for the

hearing impaired. For simultaneous interpretation, the panel has a channel selector and headphones volume adjustment. The information display shows the channel number & ISO code of the selected language and the volume setting. The chairman version of this panel has additional controls (see Confidea F-CI **71.98.0513**).

Benefits

The Confidea F-DI is a *sleek and discreet solution* that is perfectly suited to conference rooms without an existing sound system. The ability to connect headphones provides accessibility for the hearing impaired. The clear and easy channel

selector allows for user-friendly simultaneous interpretation conferences. The unit is available in a variety of *custom colors, sizes and finishes* to blend in neatly in any environment. The Confidea F-DI is backed by the Plixus® network and redundant cabling to ensure *maximum reliability*. Finally, its shielded microphone is immune to mobile phone interference.
